All types of Resor Wire fences

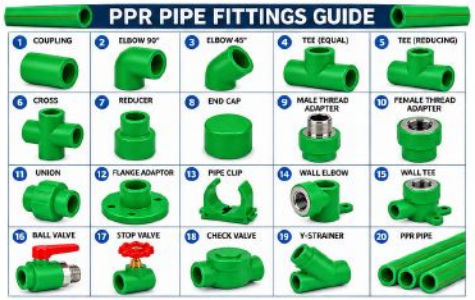

All sizes of Waterstop/ Waterbar

All Sika products available

Evi/Ritver High quality Paint Available in any types

PPR Pipes and PPR accessories

PVC Curtains Strips all sizes available

All steel channel available in all sizes

All HDPE Sizes Availables

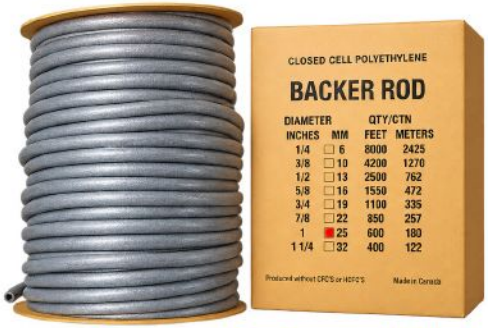

All types of Plywood board available by Sizes

All types of Wires mesh available

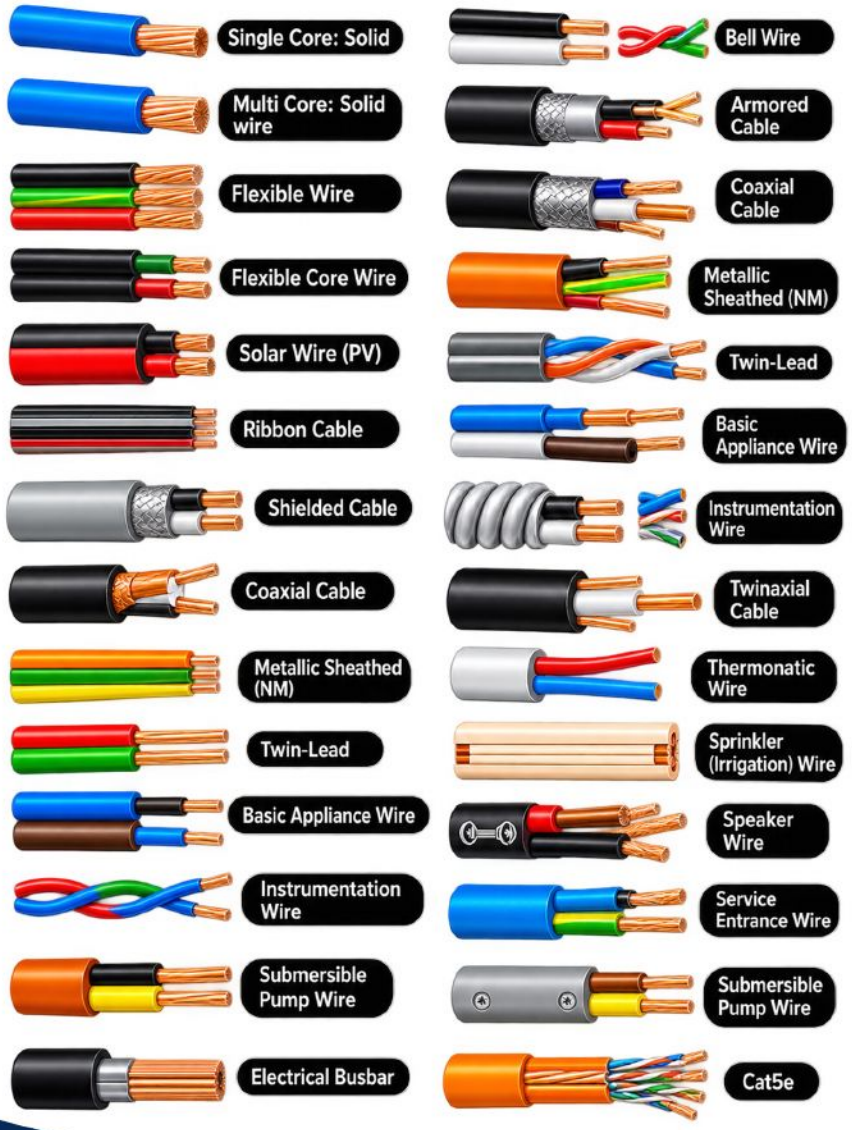

Bolts and nuts Available in differents types and sizes

Backers Rods available in differents Sizes

All types of Wires and Cables in all sizes

Types of Engineered Wood Boards

All Plywood board available in all sizes

All types of Plywood board available by Sizes

Different Types of Electrical Cables & Their Uses

(Every Electrical Engineer Must Know)

Electrical cables are the backbone of power and communication systems. Choosing the right cable ensures safety, efficiency, and long-term reliability.

1. Power Cables

- Transmission & distribution of electrical power

2. Control Cables

- For automation systems & control panels

3. Instrumentation Cables

- Signal transmission from sensors & instruments

4. Armoured Cables

- Mechanical protection for harsh environments

5. Fiber Optic Cables

- High-speed data & network communications

6. Flexible Cables

- For appliances, extension cords & tools

Right Cable Selection = Safe System + Efficient Performance

An Engineer's Expertise Reflects in the Details!

All Safety equipment available

Hard Hat

Safety Goggles

Gloves

Mask

Anti-Slip Mat

Smoke Detector

High-Visibility Vest

Fire Extinguisher

Steel-Toe Boots

Extractor

Face Shield

Respirator

Safety Harness

Life Jacket

Storage Cage

Knee Pads

Protective Apron

Tool Box

Earplugs

PEST MANAGEMENT EQUIPMENT IN FOOD INDUSTRY

RIGHT EQUIPMENT. RIGHT PURPOSE. SAFER FOOD.

An effective Integrated Pest Management (IPM) program uses the right tools for monitoring, prevention, control and hygiene to ensure food safety and compliance.

1. MONITORING & DETECTION

GLUE BOARDS

Capture crawling insects like cockroaches and ants for early detection.

UV LIGHT TRAPS

Attract and trap flying insects such as flies in processing and storage areas.

PHEROMONE TRAPS

Target specific pests like stored product insects (e.g., beetles, moths).

2. PREVENTION & EXCLUSION

AIR CURTAINS

Prevent flying insects from entering through doorways.

DOOR SWEEPS & SEALING TOOLS

Block entry points for rodents and crawling pests.

RODENT PROOFING MATERIALS

Mesh, sealants, and barriers to restrict access.

3. CONTROL MEASURES

SPRAYERS (HAND/COMPRESSION)

Apply approved pesticides in a controlled and targeted manner.

FOGGING MACHINES

Used for space treatment in severe infestations (with strict safety protocols).

BAIT STATIONS

Safely control rodent populations without contaminating food areas.

GEL APPLICATORS

Precise application for cockroach and ant control in sensitive zones.

4. SANITATION SUPPORT

INDUSTRIAL VACUUM CLEANERS

Remove insect debris, eggs, and contaminants.

CLEANING TOOLS & DISINFECTANTS

Maintain hygiene to eliminate pest attraction sources.

Electrical Wire Types Chart –
Smart & Reliable Ultimate Guide (25 Types)

GEOTEXTILES TYPES IN ROAD CONSTRUCTION

1. WOVEN GEOTEXTILE

Main Function: Separation & Reinforcement

Uses:
- Weak subgrade stabilization
- Unpaved roads
- Embankments

Advantages:
- High tensile strength
- Low elongation
- Excellent load distribution

2. NON-WOVEN GEOTEXTILE

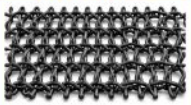

Main Function: Filtration & Drainage

Uses:
- Pavement drainage
- Subsurface drains
- Erosion control

Advantages:
- High permeability
- Good water flow
- Prevents soil migration

3. KNITTED GEOTEXTILE

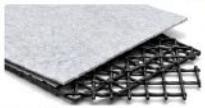

Main Function: Reinforcement

Uses:
- Soft ground improvement
- Composite geotextile products

Advantages:
- Flexible
- High deformation capacity

4. GEOCOMPOSITES (GEOTEXTILE + GEONET)

Main Function: Drainage, Filtration & Reinforcement

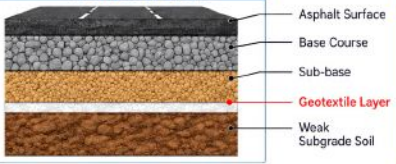

Uses:
- Highway drainage systems
- Retaining walls
- Bridge approaches

Advantages:
- High drainage capacity
- Improves performance
- Increases road life

FUNCTIONS OF GEOTEXTILES IN ROADS

- Separation of subgrade and aggregate
- Reinforcement of weak soils
- Filtration without soil loss
- Drainage of excess water
- Erosion control
- Increased pavement life and reduced maintenance

TYPICAL ROAD LAYER

KEY BENEFITS

- Improves road durability
- Reduces rutting
- Enhances drainage
- Lower maintenance cost

All types of geotextiles are available

GEO TEXTILE

GEO BAG

FILLER BOARD

MICRO SILICA

TARFELT SHEET

GEO MEMBRANE
